AS300 Veterinary Shockwave Unit

HOW IT WORKS

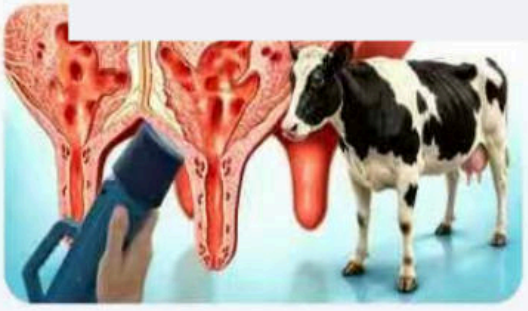

Cavitation — boosts micro-circulation and metabolism, strengthens immunity.
Pain relief — calms nerve endings and reduces pain mediator P.
Less inflammation — supports recovery, relaxes tissue, releases adhesions.
Faster micro-circulation — activates cells and tissue health.
Biological response — helps inflammation resolve and udder function recover.

▶ Portable

Trolley case + mobile battery

- ▶ Shorter withdrawal period, lower cost
- ▶ Faster tissue healing, lower cull rate
- ▶ Better immunity, healthier cows
- ▶ Non-invasive
